HACK A DAY WITH

CA$H on AD

code.adapt.evolve.

I am

Rajesh Sharma
CTO at CashOnAd Pte. Ltd.
rajesh@cashonad.com
@broncha

What is CashOnAd?

code. adapt. evolve.

What are we making today!

- A simple desktop application

- Adapt to the current situations regarding electricity in Nepal

Required criterion

- Get schedule from a web-service

- Get user preferences / settings

- Alert a user at preferred timings

- Perform user specified actions (shutdown, hibernate, ignore…)

- Browse through schedule

Additional features (plus points)

- Multi platform support

- Packaging

- System tray

- Anything else you can think of..

What tools do we have?

So what we do now!

- Form teams of 3

- Get your team a name

- Start coding!
